Feedback

ANNA: Day 2 Wk 1 Challenge

- Fun to work with
- Easy to understand
- Approachable and not intimidating
- Great approach to trial and error
- Thorough note taking & great process for taking them considering it's day 2
- Encouraged regular adding, committing, pulling, pushing
- Excellent github knowledge
- Thinks quite far ahead which was positive in that we had completed tasks before we were asked to and shows how much she's grasped TDD already, however it also felt confusing at times and sometimes over-complicated what we were trying to achieve
    - Both guilty of this at times so we both need to regularly refer back to the question
    - Might also be useful to try and slow down a little to allow your pairing partner to follow your train of thought and methodology
